Abstract

This study aims to determine the map of the development of Islamic Bank DEA research. DEA or Data Envelopment Analysis is one method for efficiency and productivity measurement. The data analyzed were in the form of publication of the DEA application research on Islamic banking totaling 201 articles. Map of the development of Islamic Bank DEA field research is obtained through the export process into the .txt file format. The export data is then processed and analyzed using the VOSviewer application program to determine the bibliometric map of the development of the DEA Islamic Bank application research. The results showed that the number of publications on the results of research on the DEA Islamic Bank application from 2004-2019 had increased significantly and was the most published in the International Journal of Islamic and Middle Eastern Finance and Management. Network visualization shows that the map of the development of the DEA Islamic Bank application research is divided into 4 clusters. Cluster 1 consists of 7 topics, cluster 2 consists of 4 topics, cluster 3 consists of 3 topics, and cluster 4 consists of 2 topics. The author who published the most research results on the DEA Islamic Bank application was Faldurudin Kamarudin. Besides, the largest contributor to the publication of research results in the DEA Islamic Bank was the Faculty of Economics and Management Universiti Putra.

Emerald journal news

The 5 most cited articles in 2015-2017

In the year that IMEFM achieves its first Impact Factor we are pleased to celebrate the research of 5 up and coming scholars in the field of Islamic Finance and Management.

The Editor [Professor M. Kabir Hasasn of the University of New Orleans](#) has provided an assessment on why these papers have something valuable to say to us.

Determinants of revenue efficiency of Islamic banks: empirical evidence from the south east Asian countries

Fadzlan Sufian and Fakarudin Kamarudin, 2015, vol 8, no 1.
Downloaded 1583 times since 2015 and cited 16 times in Scopus, with a Field-Weighted Citation Impact of 2.56

Sufian *et al's* research empirically examines the revenue efficiency of Islamic banks in the Southeast Asian countries with special focus on Islamic banks operating in Malaysia, Indonesia and Brunei. It also investigates the influence of the bank-specific and macroeconomic factors on the revenue efficiency of Islamic banks operating in those countries. It reports that the level of revenue efficiency on the domestic Islamic banks is higher compared to that of their foreign Islamic bank counterparts.

The paper is the first of its kind to provide empirical evidence on the determinants of revenue, cost and profit efficiency, and conducts a cross-sectional analysis to measure the performance efficiencies of the local and foreign Islamic banks in Southeast Asian countries
